SUMNMARY:

Frontend Developer with two and half years of experience looking for an opportunity where I can embrace my potential and utilize my experience to develop products. Adaptable to learn different technologies.

SKILLS:

JavaScript, HTML, CSS, Dart,

TECHNOLOGIES WORKED ON:

Flutter, Angular, Git, VS Code, NPM, node, Android studio

WORK EXPERIENCE:

Jr. UI Developer, Asite Solutions
Jun 2022-Present

As a UI Developer, I have worked on new functionalities and bugfixes. Initially worked on angular and mapped into flutter mobile app team.

- Played a pivotal role in improving the user capabilities by being a part of the home screen redesigning team where I worked on edit functionalities and added new shortcut filters to home screen.
- Successfully added widgets and functionalities to enhance app usability.
- Worked on test cases and bugfixes.
- Collaborated closely with senior engineers and managers and worked according to Figma design to bring their concepts to life.

Assistant System Engineer, Tata Consultancy Services
Jan 2021-Jun 2022

As a Frontend Developer, I have worked on many new features and functionalities. Created new UI Components and Services. Performed API integrations, System testing and some Bug fixes. Framework - Angular.

- Added like buttons, voting polls, new filters which improved personalized user experience.
- Created multiselect options/grouping which helped business team to get sales insight for different regions.
- Worked on notification and video content integration.
